

ACCESSORIES | ELECTRICAL

Control electric underfloor heating systems with loads over 16A from one thermostat.

- Control high load heating systems
- Snubber for ultimate protection
- IP30 rated safe for home use
- Up to 63A maximum load

ThermoSphere controls have a maximum load of 16A depending on the model. If the load of your underfloor heating circuit exceeds the maximum load of your thermostat, but you want to control it from a single thermostat, then you must install a suitably rated contactor/snubber.

Technical Data

Dimensions (mm)	180 x 110 x 82
Double insulated	Yes
Mounting	Surface mount
Models available	25A (CSN-025)
	40A (CSN-040)
	63A (CSN-063)
Protection rating	IP30

Warning: All electrical work should be carried out by a suitably qualified electrician in accordance with all of the relevant local safety regulations and standards.
